

# THERMAL PROTECTIVE LAYER

EXPOSURE GARMENT ↓

The Survitec Thermal Protective Garment (TPG) is a lightweight garment used as a base layer for fast jet ensembles. The TPG is a one piece garment to be worn above the under garments of the wearer and has a similar feel and qualities as conventional cotton underwear. Constructed of a Polartec Polyester 4-way stretch material, the TPG provides excellent insulation properties and transports perspiration away from the skin to help keep the body dry. Due to the unique design and material construction, interference with other articles of clothing is eliminated. The garment features loop holes at the thumbs and feet to ensure optimal fit for the wearer. Available in a wide range of sizes, the TPG is suitable for both male and females.

## FEATURES

- SUPER-STRETCH OUTER LAYER TO IMPROVE FIT AND COMFORT
- NO INTERFERENCE WITH OTHER ARTICLES OF CLOTHING
- ONE PIECE GARMENT FOR QUICK AND EASY DONNING
- LOOP HOLES FOR THUMBS AND FEET TO ENSURE OPTIMAL FIT
- SUITABLE FOR MALE AND FEMALE FAST JET PILOTS

“  
Comfortable base  
layer garment”

## THERMAL PROTECTIVE LAYER

### EXPOSURE SUIT ↓

Material resists compression exerted during immersion, maintaining excellent levels of thermal insulation

Streamline design to ensure no interaction with other items of clothing

Comfortable 4-way stretch material

Lightweight polartec polyester material provides excellent insulating properties and comfort against skin

Elasticated thumb loops at cuffs prevent sleeves moving during donning of garments over the top

Elasticated foot loops at ankles prevent legs moving during donning of garments over the top

**WORN IN CONJUNCTION WITH  
SURVITEC FAST JET ENSEMBLES**
