SUR-3818-1000
**UNI-PAC III,
AIR DROP
SAR KIT**

The UNI-PAC III system is a semi-rigid aerial delivery container that is designed to be stored and released from the P-8 Poseidon weapons bay to provide inflatable life raft & survival equipment for survivors in a water rescue scenario. The system consists of a 20-person life raft & survival aids to support the occupants for several days as well as a parachute deployment system that allows the system to be accurately dropped from the P-8 at various airspeeds and altitudes.
