

LIFE PRESERVER

US MIL. SPEC MIL-L-38484

LPU-10/P Replacement

LPU-10/P-2

**Direct replacement
for the LPU-10/P
life preservers,
with improved
performance,
materials, and
construction.**

Times change, technology advances.

Omni's **LPU-10/P-2** is a direct replacement for the LPU-10/P. Updated construction of the cells replaces outdated neoprene with flame-retardant, polyurethane-coated 210D Nylon. The cells are manufactured using RF Welding technology, creating a permanent seal without the use of glues or adhesives.

The **LPU-10/P-2** is available as individual bladders, or as a full system with carrier (available in coyote brown and foliage green).
